

NORTHWEST Rotary Tiller

A BRIEF LOOK AT THE NEW DOUBLE DRIVE "L" SERIES ROTARY TILLER

Built around the standard "L" Tiller, the addition of a second drive assembly allows its use with tractors of up to 250 H.P. at the P.T.O.

It is also equipped with the new Northwest larger capacity "U" joint assembly. May be furnished with either gauge wheels or the mesh roller shown above.

The above photo shows a 12' DD-L tilling in heavy sagebrush approximately 8" deep operated by a 275 H.P. tractor (225 at P.T.O.).

Note excellent job in single pass.

Built in sizes 12' — 14' — 16'

For heavy duty tilling with up to 165 H.P. tractors,
see the single drive Model "L" series.
