in the BAG

A LINE-UP OF PRO

Today there is available a line of Produce Bagging Equipment that, in its field is unsurpassed for speed, bruise-free handling and low cost operation. All are combined with profit making abilities for its owners.

Placing produce in pre-package bags has come about through market trends and merchandising. The solution to the problem of bruise-free bagging is brought about by means of the Northwest Produce Bagger. This new, level loading, tilt filling bagging idea swiftly transfers produce from chute to bag without dropping or bruising.

In the bag the modern way—Since the scales become the heart of any bagging equipment, an especially designed bagging scale highly accurate and rugged assures positive weight. Scales can be serviced by any authorized scale man. The chart and indicator is designed for quick and accurate readings. Delicate mechanism is sealed from moisture, abrasion and dirt. The scales are optional.

Your customer wants tamper-proof pre-packing—free from contamination. Bag your share of profits. Order today from Northwest Equipment Company's complete bagging line.

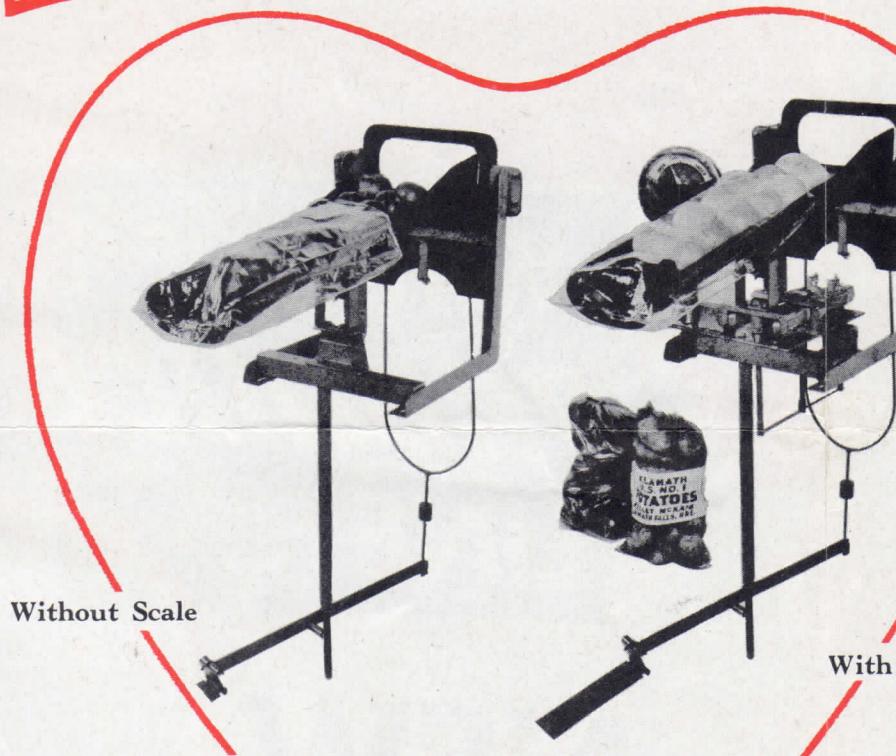

★ SAVES LABOR

★ LOW IN COST

Pictured above are two Model PB 200 Produce Baggers with tip tilt heads for bruise free handling of rolling type produce. These units can also be furnished with fixed tilt heads for bagging potatoes and other type produce that does not require as careful handling. Bags from 3 to 10 pounds. It will mount to conveyor belts, rotary tables and covered rotary type packing tubs. Special custom made adaptor bagging heads upon request.

Produce Bagger is manufactured with curved or straight type gate—depending whether operation is from belt or rotary type table.

SPECIFICATIONS

Sturdy and easily adjustable—steel construction. Royalite gate and bagging head. Adjustable height, 36"-40"; width, 17". 15 lb. capacity scale.

Here again our PB-500 Model Rotary type bagging table may be equipped with 1, 2 or 3 PB-200 bagging units (with curved gates). As pictured—the Fixed Tilt PB-52 is being used with a paper bag. Holders are furnished to fit any type of bag. Produce may be dumped or conveyed on the table.

Designed especially for potatoes and other flat type produce.

PRODUCE BAGGERS

MODEL PB-100. Here's a new portable produce bagging unit you will like because it is streamlined for more convenience and speed. Of sturdy steel tripod construction, this machine is mounted on rubber locking type casters and includes: scales (optional), Royalite bagging head, juggle box, bag supply holder, foot operated reversible rotary gate and vibrator, and box dump. This machine can be power fed from conveyor. Bagging head and scales are same as used on PB-200. **SPECIFICATIONS**

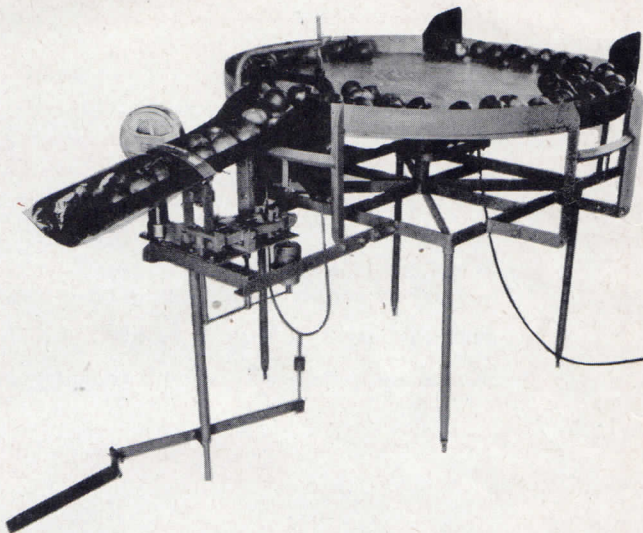

Sturdily constructed and portable—Royalite adjustable hopper and chute—Royalite juggle box, bag supply holder. Complete with 15 lb. capacity scale. Width, 36"; height, 48"; length, 54".

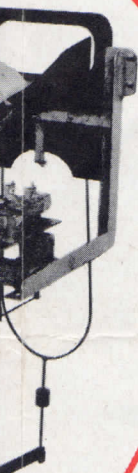

MODEL PB-500 is a Rotary Bagging table that will accommodate 1, 2 or 3 PB-200 Produce Bagging units (with curved gates). Its quiet running 4' diameter revolving platform is motor driven and is supplied with 15' cord—the frame work is of sturdy construction with four adjustable pin type legs. Pictured is a PB-200 unit equipped with a PB-50 tilting chute which is used to fill any headed or unheaded open top bag. The PB-500 may be fed with box dumps or from conveyor.

SPECIFICATIONS

Rigid steel construction—motor driven 4' revolving platform—15' electric cord—space for 1, 2 or 3 produce bagging units. Adjustable height—38" to 40"; width, 48".

As pictured this PB-500 Model Rotary Type bagging table is shown with PB-200 produce bagger (with curved gate). This unit is equipped with Model PB-51—Tilting Apron—Bagging Head—for all headed, mesh or elastic top bags. Designed for careful handling of all rolling type produce.

AN ANSWER TO CLOSING THE BAG

MODEL PB-9. Foot operated stapler has many advantages over other types and is offered as a separate unit. A highly specialized stapler that is quickly demountable, low in cost and high in performance that will give you trouble-free service. It is equipped with two Markwell RF master heads which are attached to a floating mount—thus allowing the stapling of uneven thicknesses. The front door flips open for filling and freeing staples. It has an adjustable Royalite apron and a weighted anchor base for stability. Each unit holds 250 $\frac{1}{4}$ " or $\frac{3}{8}$ " staples. Designed to close all types of headed pliofilm or paper bags. This unit is a real bagging bargain.

SPECIFICATIONS

Height 40"—All-over width, 12" x 14"

ORDERING DATA

- When ordering specify type of operation such as: rotary table, conveyor belt or hand dump—height of produce supply from floor—kind of produce to be bagged—with or without scale.
